COMPLETE CONSTRUCTION, REPAIR ON HOUSING;
ALLOCATE FUNDS FOR DAM PROJECT

During 1950, 3,125 dwellings in the Eastern Sector of Berlin were newly constructed, 24,000 received minor repairs, and approximately 36,100 underwent major repairs. The 1951 housing budget is double that of 1950.

The 6,300 clay-construction buildings completed in Land Sachsen-Anhalt cost 32 million German marks. Three totally damaged, 25 heavily damaged, and 50 slightly damaged buildings were repaired at a cost of 65,000 German marks.

The Ostharz Water Control Organization in Blankenburg has been granted 2 million Deutsche marks by the East German government for construction work in 1951 on the Wippertal auxiliary dam. The dam, which is to be completed in 1952, will be erected above the town of Wippra. Four million Deutsche marks have been allocated for the entire project, which is designed to eliminate the frequent flooding of the Wipper valley and to safeguard the supply of drinking and industrial water for the mountain area of Mansfeld.
